

## **Spring and Autumn Workshops:**

### **Bonding Psychotherapy**

*For refreshment and introduction*

In the Therapeutic Community, we work with the integration of old injuries and the exploration of current conflicts and needs.

The workshops include bonding-based experiential exercises, trauma-therapeutic approaches, and creative impulses. The aim is to develop an inner attitude of care, love, and encouragement, which also opens space for playfulness and lightness.

Seminar language: German with occasional summary translation
